Introduction

Predictable patterns of human nature can be accurately measured through behavioral assessments. A clear understanding of these predictable behaviors can enable productive outcomes. When individual behavioral scores are compiled to examine members of a team, managers are able to see areas of strength, pursue improvement opportunities, and secure the resources needed to deliver on organizational goals.

CONTENTS OF THE REPORT

- Overview - A summary examining the composition of your team for both DISC and behavioral segmentation expressed as a percentage.
- Team Composition - Defines the makeup of your organization by behavioral segment and shares the DISC graphs of individuals on your team.
- Behavioral Segment Analysis - Examines the individuals within each segment, segment characteristics, ways to communicate, and ideal environment.
- Group Wheel Plots - Identifies the natural, adapted, and migrated styles of each team member.
- Behavioral Style Comparison - Compares individual scores to others on the team, team averages, and population means.

Team DISC Overview

The TTI Success Insights® wheel is a graphic representation of a team's behavioral make-up among the four quadrants of the DISC wheel.

OBSERVING DISC

Have you ever noticed:

- Some people are forceful, direct, and results-oriented
- Some are optimistic, fun, and talkative
- Some are steady, patient, and relaxed
- Some are precise, accurate, and detail-oriented

DEFINING DISC

Dominance

How you respond to problems and challenges.

Influence

How you influence others with your point of view.

Steadiness

How you respond to the pace of the environment.

Compliance

How you respond to rules and procedures.

The TTI Success Insights® Wheel

The wheel illustrates the blending of the four DISC styles, while also demonstrating the similarities and differences in behavioral styles among the team members. This wheel shows the behavioral composition of a team, represented as percentages in each of the eight segments.

BEHAVIORAL SEGMENT DEFINITIONS

CONDUCTOR - D - People who tend to be direct, decisive, and seek results.

PERSUADER - D/I - People who tend to convince others by appealing to reason, understanding, or emotion.

PROMOTER - I - People who tend to verbalize many thoughts in order to influence outcomes.

RELATER - I/S - People who tend to take time, think positively, and are focused on interpersonal relationships.

SUPPORTER - S - People who tend to be champions of sound ideas, working steadily and diligently to ensure a project is fully realized.

COORDINATOR - S/C - People who tend to be fact-oriented and adhere to proven methods to complete projects and tasks.

ANALYZER - C - People who tend to seek out accuracy in all activities and ensure the highest quality possible by gathering precise data.

IMPLEMENTOR - C/D - People who tend to assess, leverage facts and figures, and advance toward a solution.

Promoter Team Characteristics - (I)

Promoters tend to verbalize many thoughts to influence outcomes. The following information will give the team members a clear understanding and appreciation of Promoters.

STRENGTHS AND WEAKNESSES

POTENTIAL STRENGTHS

- See the "big picture" and communicate it
- Promote the team throughout the organization
- People-oriented
- Advocate for new ideas and products
- Communicate well with others

POTENTIAL WEAKNESSES

- Inattentive to detail
- Emphasize fun over efficiency
- Listen selectively to team members
- Overly optimistic about team abilities
- React based on emotions

Wheel Segment Definitions

The following matrix illustrates the blending of the four DISC styles into eight segments. Each segment contains a definition and the percentage of team members in the respective segment. Segments are deliberately located beside the segment that has the opposing style.

CONDUCTOR - D (20%)	SUPPORTER - S (0%)
People who tend to be direct, decisive, and seek results.	People who tend to be champions of sound ideas, working steadily and diligently to ensure a project is fully realized.
PERSUADER - D/I (10%)	COORDINATOR - S/C (20%)
People who tend to convince others by appealing to reason, understanding, or emotion.	People who tend to be fact-oriented and adhere to proven methods to complete projects and tasks.
PROMOTER - I (30%)	ANALYZER - C (0%)
People who tend to verbalize many thoughts in order to influence outcomes.	People who tend to seek out accuracy in all activities and ensure the highest quality possible by gathering precise data.
RELATER - I/S (0%)	IMPLEMENTOR - C/D (20%)
People who tend to take time, think positively, and are focused on interpersonal relationships.	People who tend to assess, leverage facts and figures, and advance toward a solution.

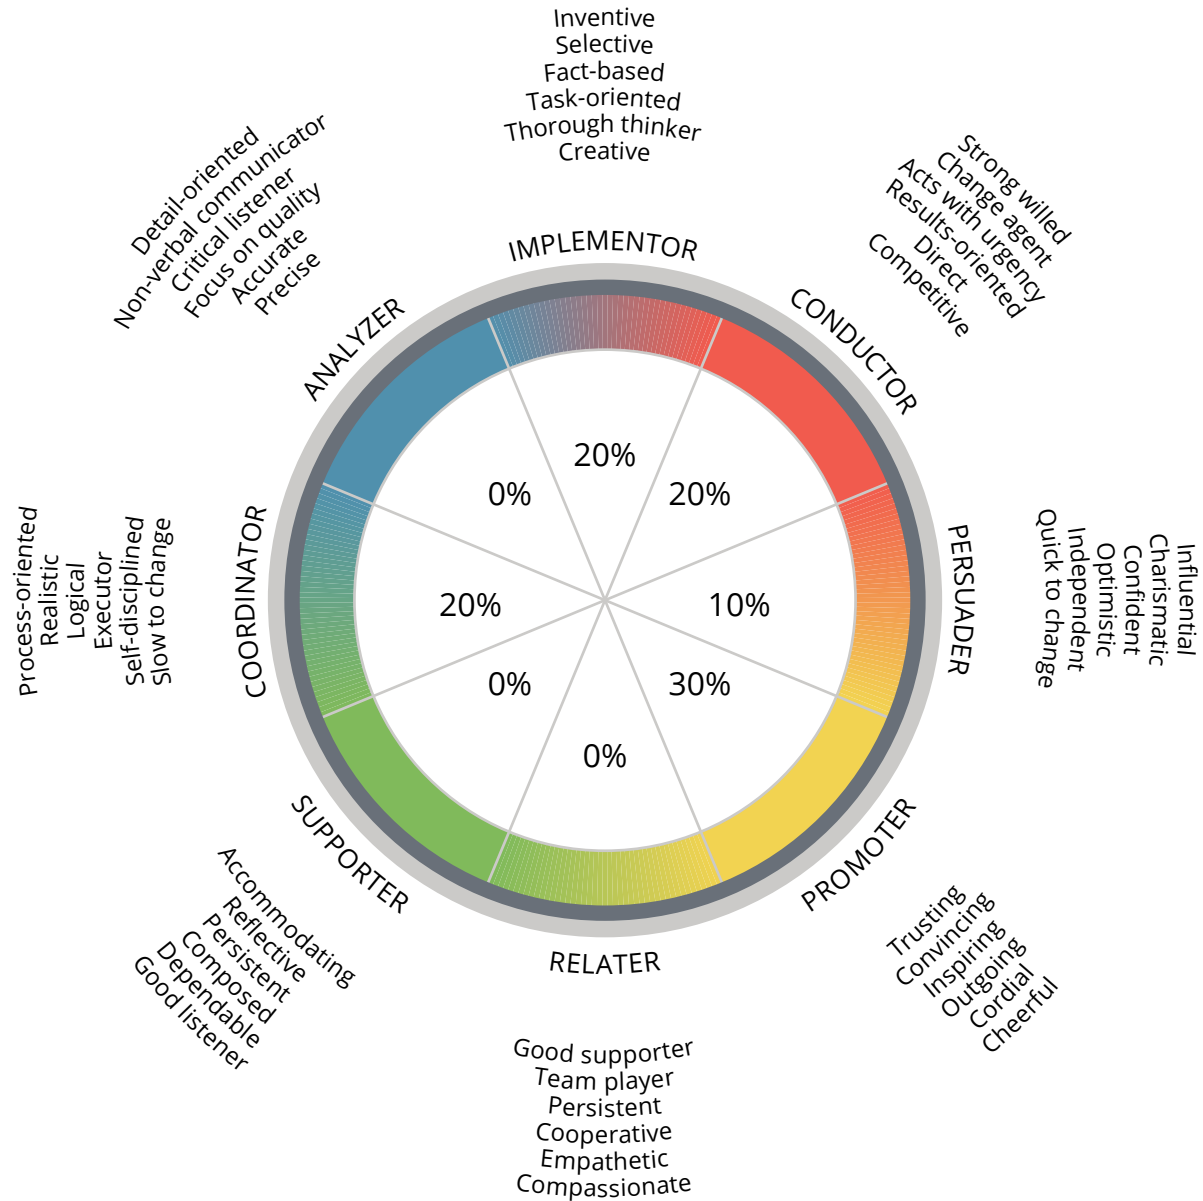

Team Member Overview

Behavioral Hierarchy Defined

Twelve behavioral factors that are critical to team success are measured in this assessment. Comprehending each phrase and its definition drives a common language that will enable you to compare individual scores, the team average, and the population means on subsequent pages.

Analysis - Compile, confirm and organize information.

Competitive - Want to win or gain an advantage.

Consistent - Perform predictably in repetitive situations.

Customer-Oriented - Identify and fulfill customer expectations.

Persistence - Finish tasks despite challenges or resistance.

Following Policy - Adhere to rules, regulations, or existing methods.

Frequent Change - Rapidly shift between tasks.

Interaction - Frequently engage and communicate with others.

Organized Workplace - Establish and maintain specific order in daily activities.

People-Oriented - Build rapport with a wide range of individuals.

Urgency - Take immediate action.

Versatile - Adapt to various situations with ease.

The Bell Curve Defined

Understanding how to read a bell curve and standard deviation will enable you to clearly analyze the composition of your team.

The bell curve, known as a normal distribution, is the most common type of distribution for a population. The highest point on the curve, represents the highest population of people, or the mean of the group. The standard deviation is a number used to show how data is spread out from the mean, representing a percentage of the total data collected.

For example, if the assessment scores of 100 people are collected and used in a normal probability distribution, 68 people, representing 68% of the 100 assessment scores, should fall within one standard deviation of the mean. Thirty four percent will be one standard deviation above the mean and 34% will be one standard deviation below the mean. The remaining 32% of people will be two or more standard deviations away from the mean. Sixteen percent will be two or more standard deviations above the mean and 16% will be two or more standard deviations below the mean.

Behavioral Style Comparison
